

# AWD & 4x4 SERIES

GVM: 4,500 – 13,900KG GCM: 6,000 – 20,500KG

THE  
**one**

**ISUZU**  
RELIABILITY IS EVERYTHING

## THE ONE

Australia's number one truck company\* is proud to present a range of All Wheel Drive (AWD) and 4x4 models that starts with the nimble NLS 200 AWD 4,500kg GVM model and goes through to the 13,900kg GVM FTS 800 4x4 model.

Based on the class-leading N and F Series, there are a total of 13 specifications to select from including Crew Cab variants and selected models with PTO

as standard fitment. Then there's the NLS AWD Tipper complete with an all steel body and hydraulic hoist, fully built-up and ready to go to work.

And even though each model is specified to match different applications, this range shares many common features including outstanding levels of driver comfort, class-leading safety features and impressive on-road performance from the new Isuzu SiTEC Series III engines.

At the business end, Isuzu N Series' AWD front axle drive is through a fully independent wishbone, banjo type final drive with Birfield joints and manual lock hubs. The higher rated NPS, FSS and FTS 4x4 models are specified with fully floating axles suspended by alloy steel leaf springs and double acting shock absorbers. These are all robust axle and suspension systems with proven durability and legendary Isuzu reliability.

You'll find the cabs all have bigger doors opening to a full 90°. With the aid of non-slip steps and long grab handles, getting in and out is easier and safer than ever before.

Inside the roomy cab you'll find all controls within easy reach. Optimum levels of driver comfort are provided in the F Series through the industry benchmark ISRI 6860 suspension seat. Start the engine and you'll also notice how remarkably quiet it is inside.

## THE ONE FOR COMFORT AND SAFETY

Sit at the controls of any one of these trucks and you'll see how packed they are with features – from innovative ideas like the 13cm colour screen 'infotainment system', the huge fluoro interior light and a host of storage compartments, drink holders and more.

And while it's a pleasure to drive an Isuzu, it's also

safer with driver's SRS airbag protection as standard on all models.

## THE ONE FOR THE ENVIRONMENT

Isuzu's new SiTEC Series III diesels fitted to all Isuzu models are economical, lightweight and compact with better performance than ever before.

Back in 2008 when ADR 80-02 emission standards were introduced to the Australian truck

4x4 CAPABILITY  
1 TRUCK

market, Isuzu chose to go further and introduced Euro IV compliant SiTEC Series II engines (far exceeding the standards required under ADR 80-02). Having performed admirably over the last 3 years, only minor refinements were necessary resulting in the new Isuzu SiTEC Series III diesels, which are Euro V compliant and again exceed the standards required under ADR 80-03 effective January 2011.

It means that Isuzu has greater experience with

low emission conventional diesel engines in the Australian market than any other Japanese brand. The result? The Isuzu SiTEC Series III diesels boast impressive power and torque, better fuel economy and even lower emission levels than ever before.

### THE ONE FOR SUPPORT

Isuzu Care is the most comprehensive customer care program ever seen in the Australian truck market, offering truck buyers and owners a suite of

innovative support services. A good example of this is the peace of mind offered by Isuzu Assist (Freecall 1800 947 898), the industry-leading roadside assistance program that's standard for all Isuzu trucks for a period of 3 years from the date of delivery. Add the in-house Customer Care Centre (Freecall 1800 035 640) and you can rest assured that operating an Isuzu is an extremely positive experience for owners and drivers alike.

Banjo type front axles with Birfield joints.

2 Speed transfer cases.

Rugged 2-stage steel spring suspension with double-acting shock absorbers.

Driver SRS airbag is standard across the 4x4 range.

Simple 4x4 mode controls.

# CHOOSE THE ONE THAT CAN HANDLE THE TOUGHEST ENVIRONMENTS
